Brief Introduction

Exclusively designed for downloading videos from Amazon Prime Video, CleverGet Amazon Downloader is the top-notch choice to help you play and watch Amazon Prime videos offline on various players and devices. It could help you save and download Amazon Prime videos to MP4/MKV files with desired audio tracks and subtitles retained. Downloading Prime HD movies is a simple piece of cake since it could provide videos at different resolutions including 1080P, 720P, etc. for users to download.

Main features:

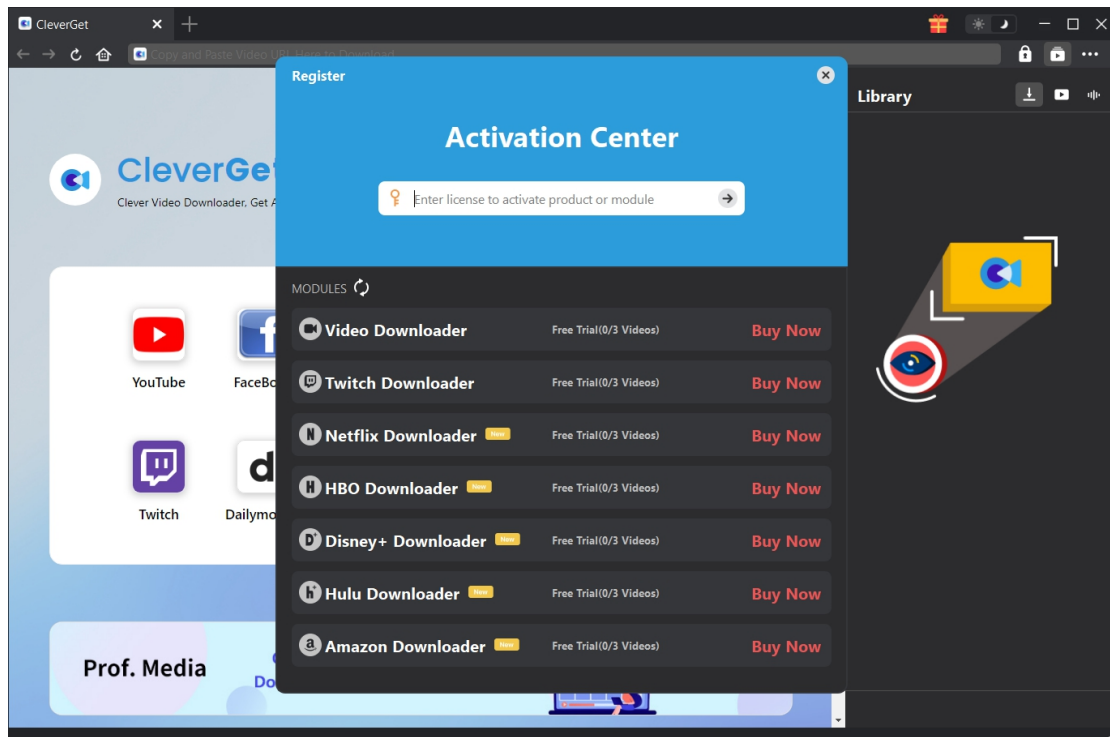

1. Download movies and TV shows from Amazon Prime Video without quality loss.
2. Download Amazon Prime videos at 1080P, 720P or original resolution.
3. Download and save multi-lingual audio tracks and subtitles from Prime videos.
4. Download subtitles in either independent SRT/SUP file or remux subtitles into output video.
5. Support playing back Amazon Prime video during downloading.
6. Provide precise video information including title, length, resolution, size, etc.
7. High speed of downloading.
8. Built-in player and browser.

How to Register CleverGet Amazon Downloader

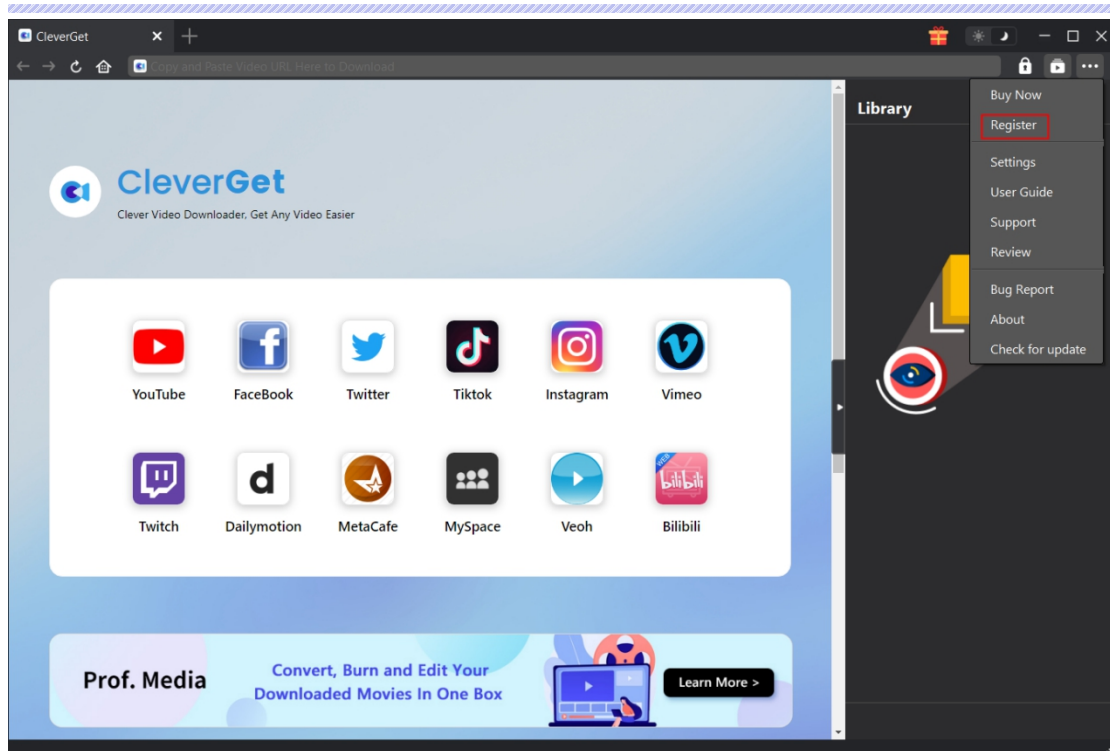

1. Activate with registration code

You could register and activate CleverGet Amazon Downloader module by following the 2 methods below:

- a. Kick off CleverGet, then click the “Activate” button  in the top right corner to enter “Activation Center”. Copy and paste the registration code into the code box. Tap “Enter” key on keyboard or click  to activate.

- b. Or, click the three-dot icon  and then open the “Register” option to enter “Activation Center” for activating registration code.

2. Get registration code

On the “Activation Center”, choose the modules that you want to get registration code for and then click “Buy Now” button. After you click the button, it’ll take you to the purchase page of CleverGet modules, where you can purchase the registration code for all modules. Select validation according to your needs and then click “Check Out Now” to go to the payment page. Fill in the information it needs in the payment page and pay for the bill. The registration code will be sent to your E-mail box after you finish the payment in no time.

If your registration code is to be expired and you are going to renew registration to prolong the use of CleverGet Amazon Downloader, on the “Registration Center” interface, click “Renew” button right next to the CleverGet Amazon Downloader module. And then finish renewing purchasement on the renewal page. You will get a renewal registration code, with which you could activate CleverGet Amazon Downloader to prolong using it.

How to Download Videos from Amazon Prime Video?

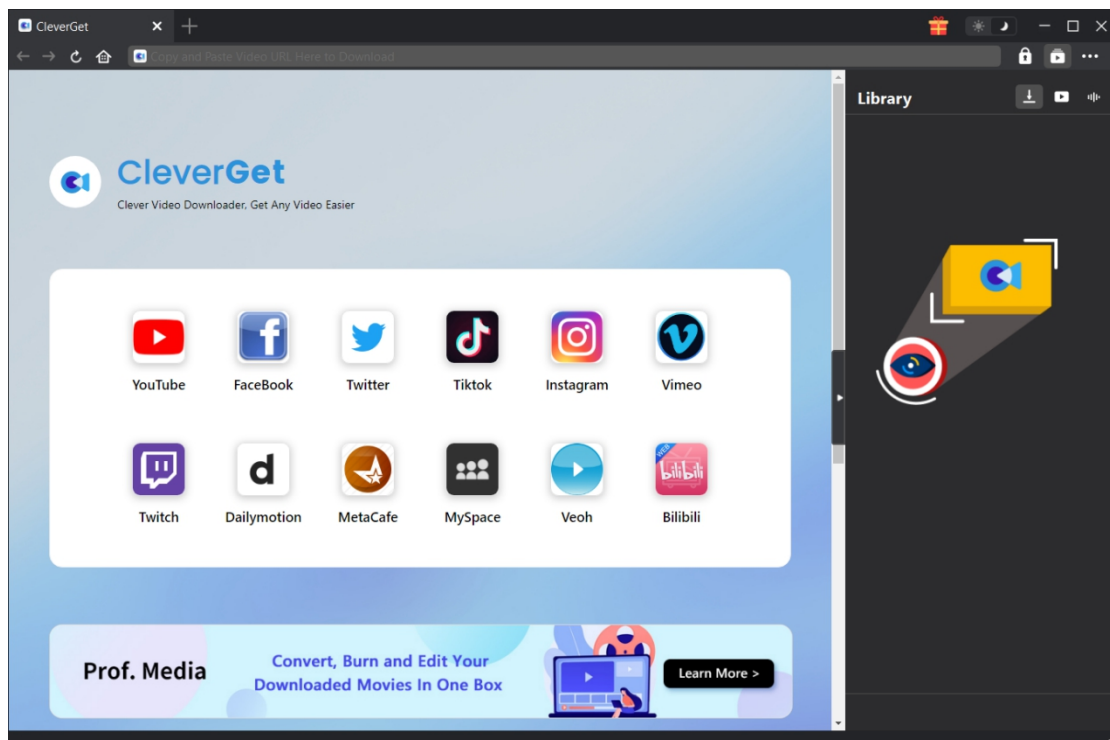

Check the below guide to learn how to use CleverGet Amazon Downloader to download movies or TV shows from Amazon Prime Video.

Note: Currently, CleverGet Amazon Downloader could only download one video from Amazon Prime Video at a time.

Step 1: Download and Install CleverGet

Go straight to the official website of CleverGet to download installation package. It is free to download and install.

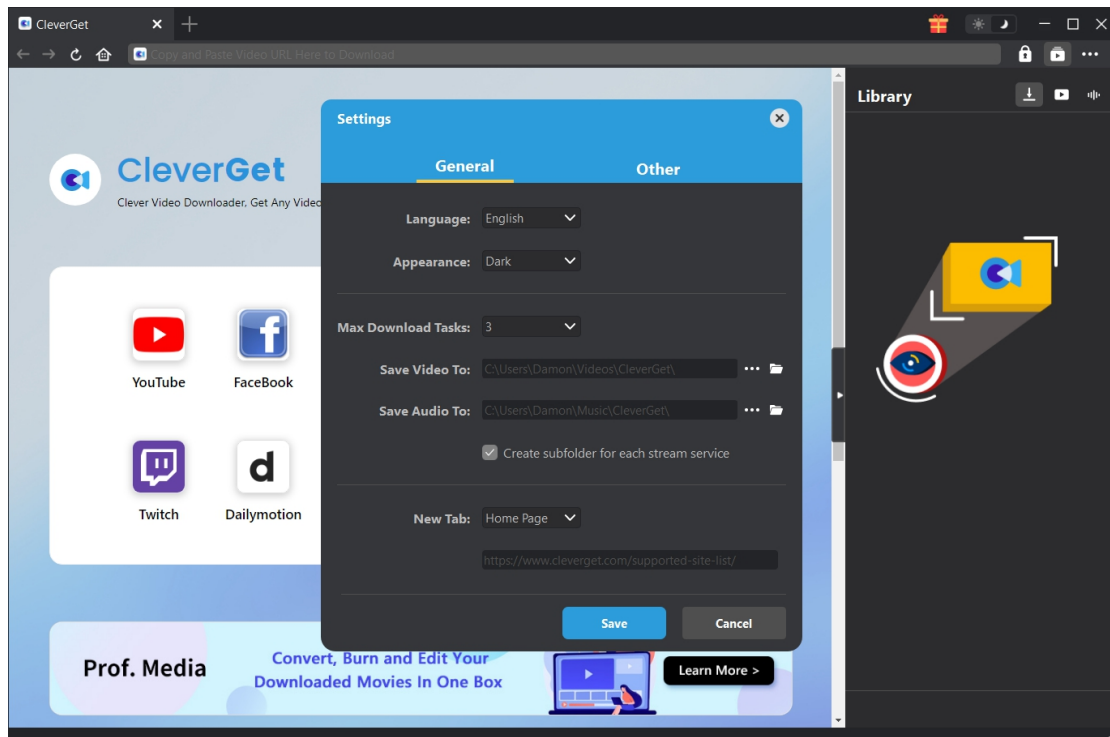

Note: CleverGet Amazon Downloader is a component of [CleverGet](#) program.

Step 2: Set Output Directory

CleverGet has default download directory to save downloaded Amazon Prime videos, but allows you to customize the download directory. Before you start downloading Prime videos, you could click the three-dot icon **•••** and then open “Settings” option to pop up detailed settings panel.

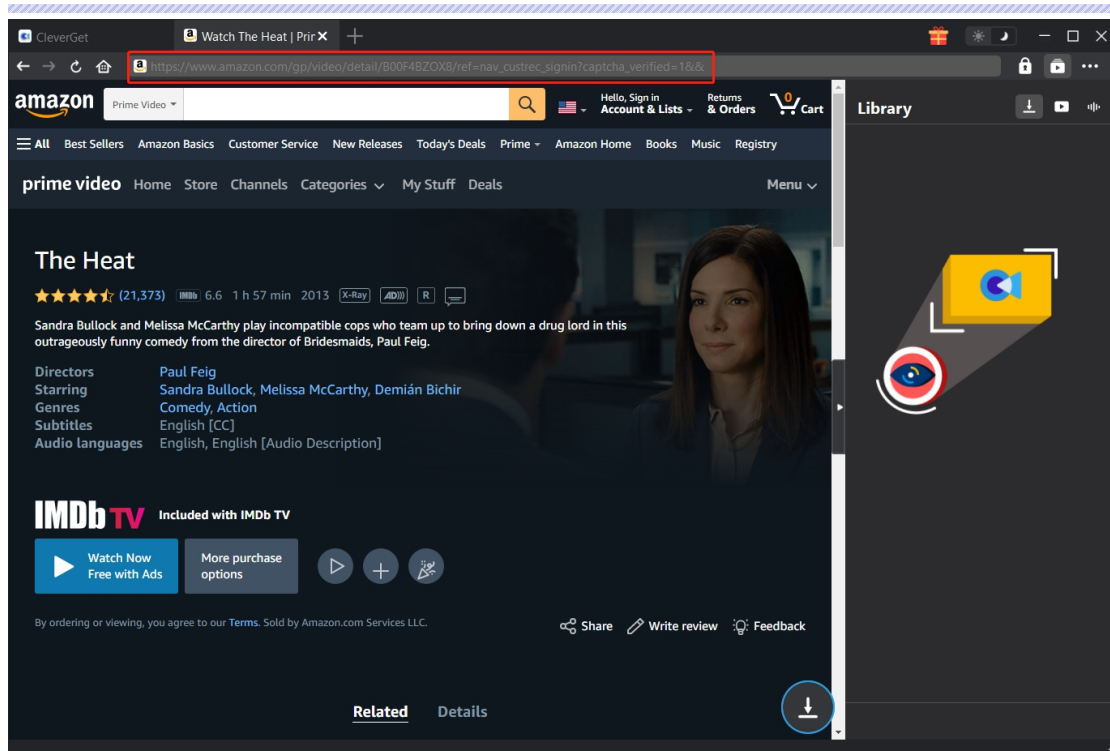

Under “General” tab, you can set output directory in the “Save Video To” or “Save Audio To” box and change other settings. Checking “Create subfolder for each stream service” option will save online videos in related sub-folder according to video website. Finally, click “Save” button.

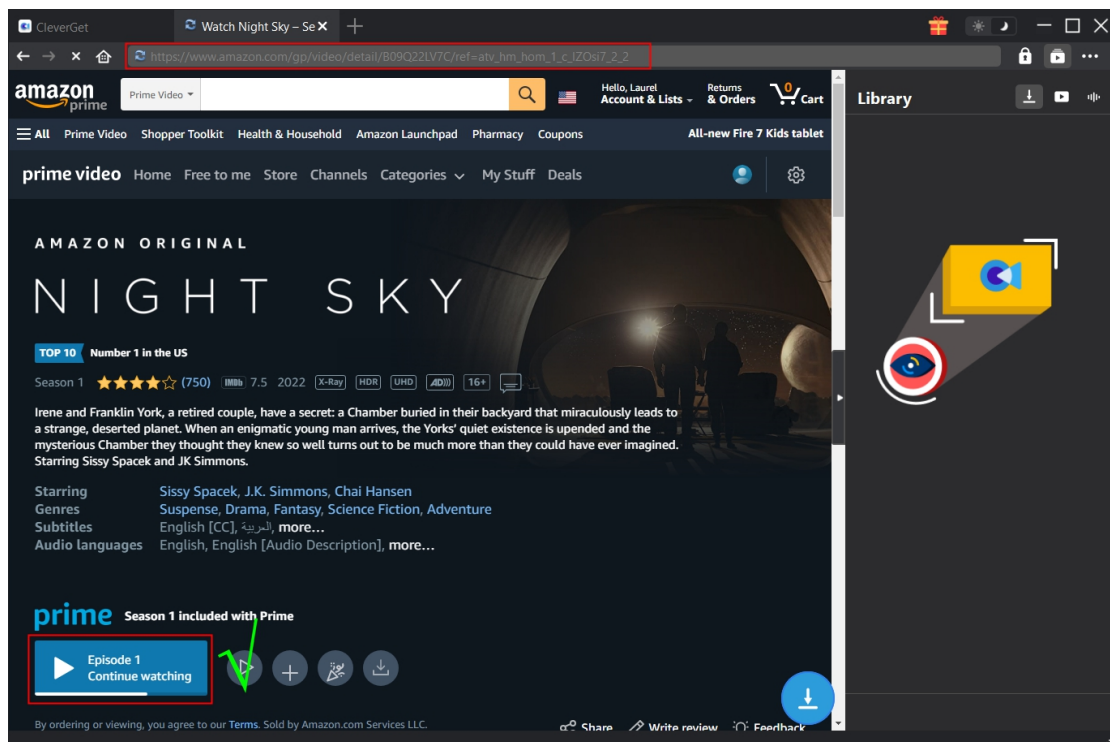

Note: You could also adjust program UI language, color mode, max download tasks, and New Tab here.

Step 3: Search for Target Videos

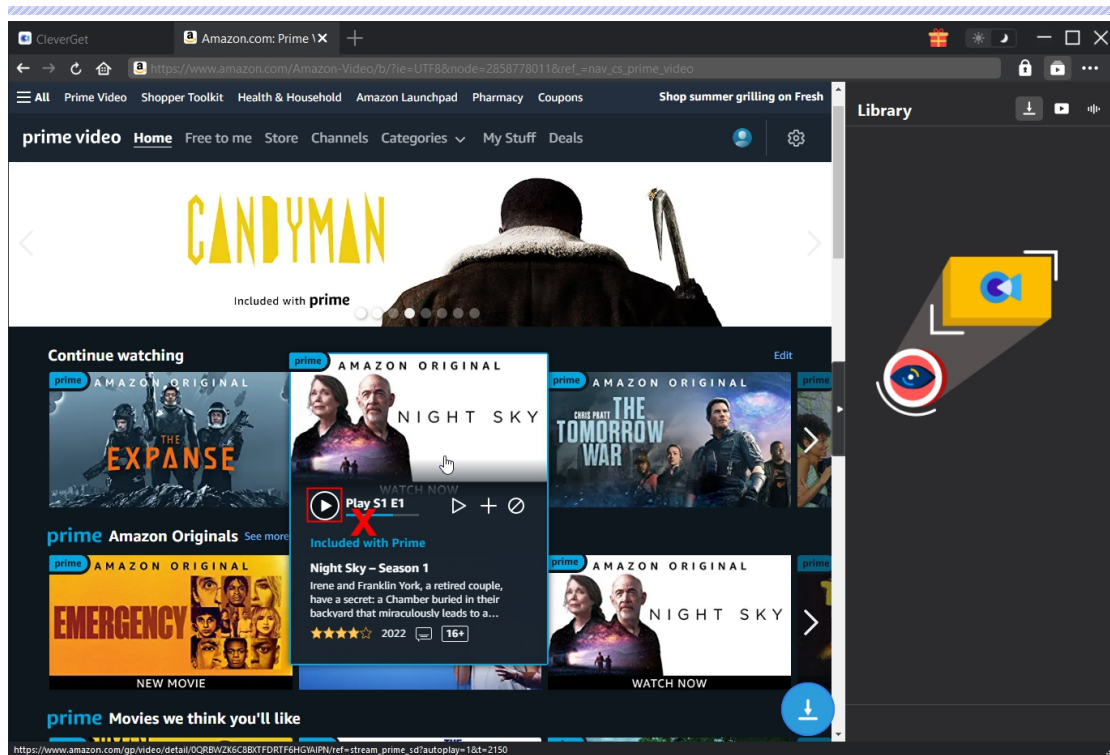

You could directly copy and paste Amazon Prime video URL into the address bar to locate target Amazon Prime video for downloading. CleverGet allows you to log into Amazon with your own Amazon account and password.

To ensure successful video parsing, you need to enter the detail page of Amazon videos and then click to play it back.

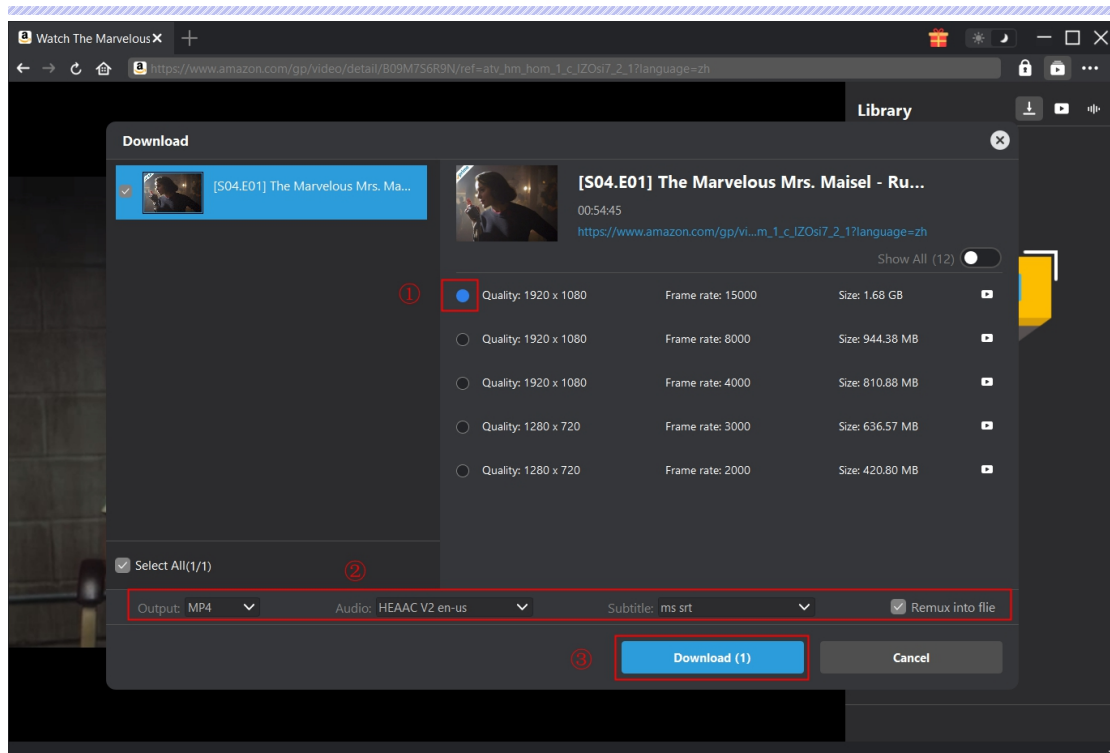

Note: Do not directly click the “Play” button on the Prime home page to let CleverGet Amazon Downloader parse video URL and detect downloadable options.

Step 4: Select Video and Download

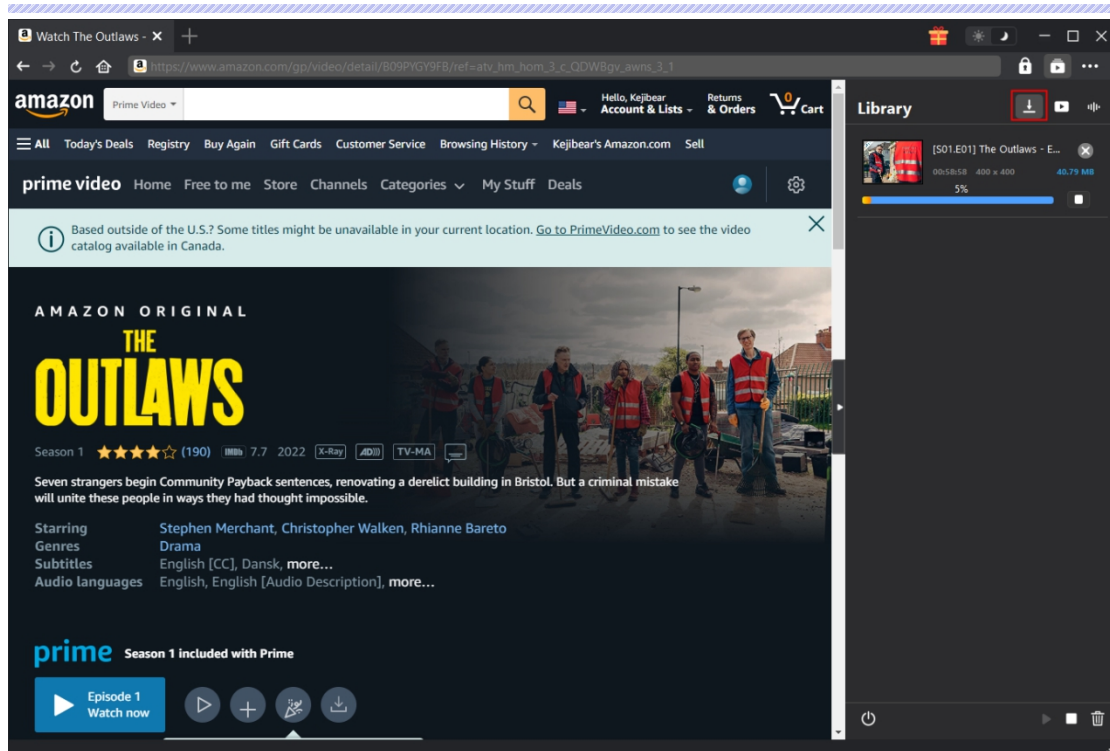

Once you open an Amazon Prime video link, you will see the download icon  at the bottom right corner. Click it and then CleverGet Amazon Downloader will detect available sources to download. On the “Download” interface, video download options are listed in different quality/resolution, frame rates and sizes. You could also determine to get MKV or MP4 output, select audio tracks and subtitles to download from Amazon Prime video, and decide whether or not to remux subtitles into output video file. Select the right video download option, complete audio track and subtitle selections, then click “Download”.

Note: Subtitles will be combined into video for output if you check "Remux into File" option. Otherwise subtitles will be saved in either SRT or SUP format separately.

Step 5: Check Downloading Process

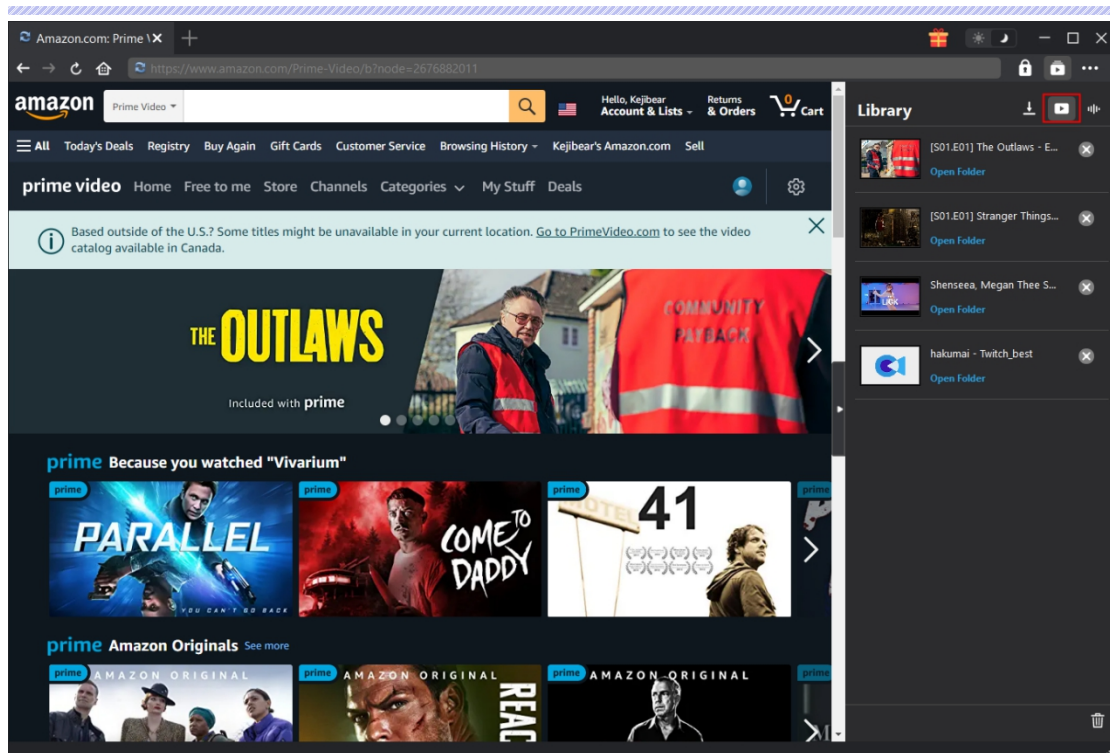

On the right sidebar, click "Downloading" icon  to check out the video in downloading. You could view the downloading progress and speed.

Click "Close" icon  to end and delete the task.

Step 6: Check Downloaded File

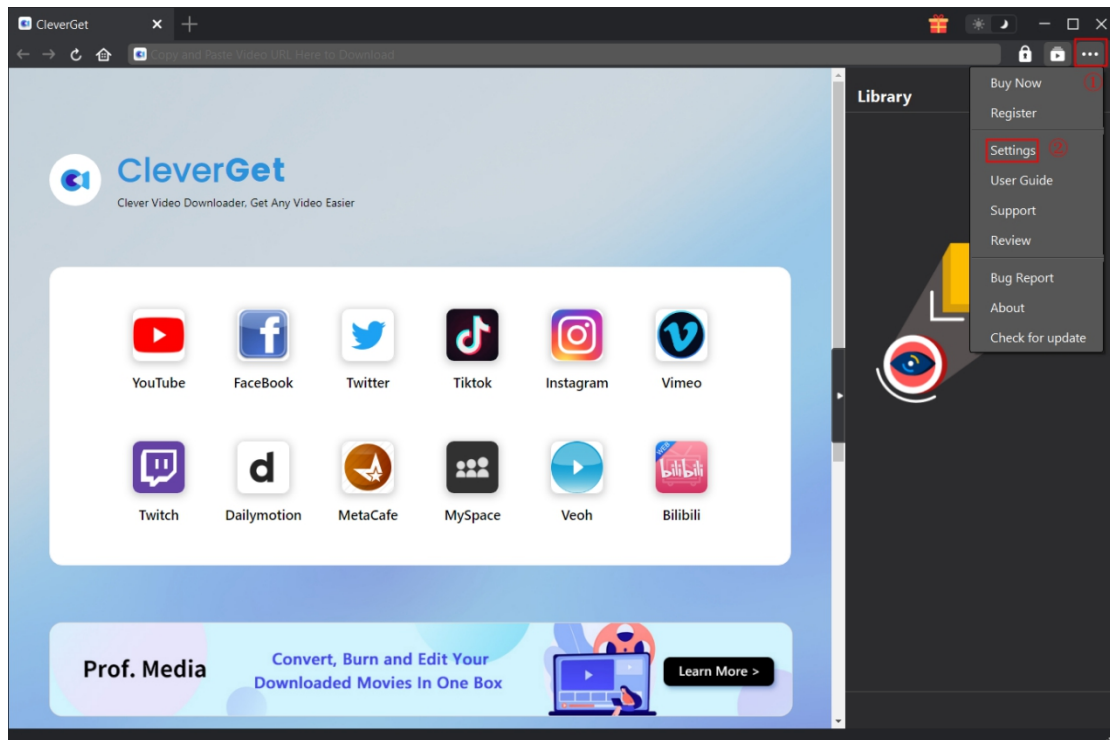

When the process of downloading is finished, you can check downloaded files according to file types: video or audio.

Click "Play" button in the thumbnail of downloaded file to play it or click "Open Folder" to open file in its exact location. Right-click file to choose to play it with [Leawo Blu-ray Player](#), delete it, delete all or open web page where it was downloaded.

How to Set CleverGet

CleverGet is user-oriented and there are abundant settings for facilitating operation and improving user experience. Users can click three dots icon to look for “Settings” to enter settings panel. After all settings are finished, click “Save” to save all changes.

There are several tabs in the settings panel. Here we introduce them one by one.

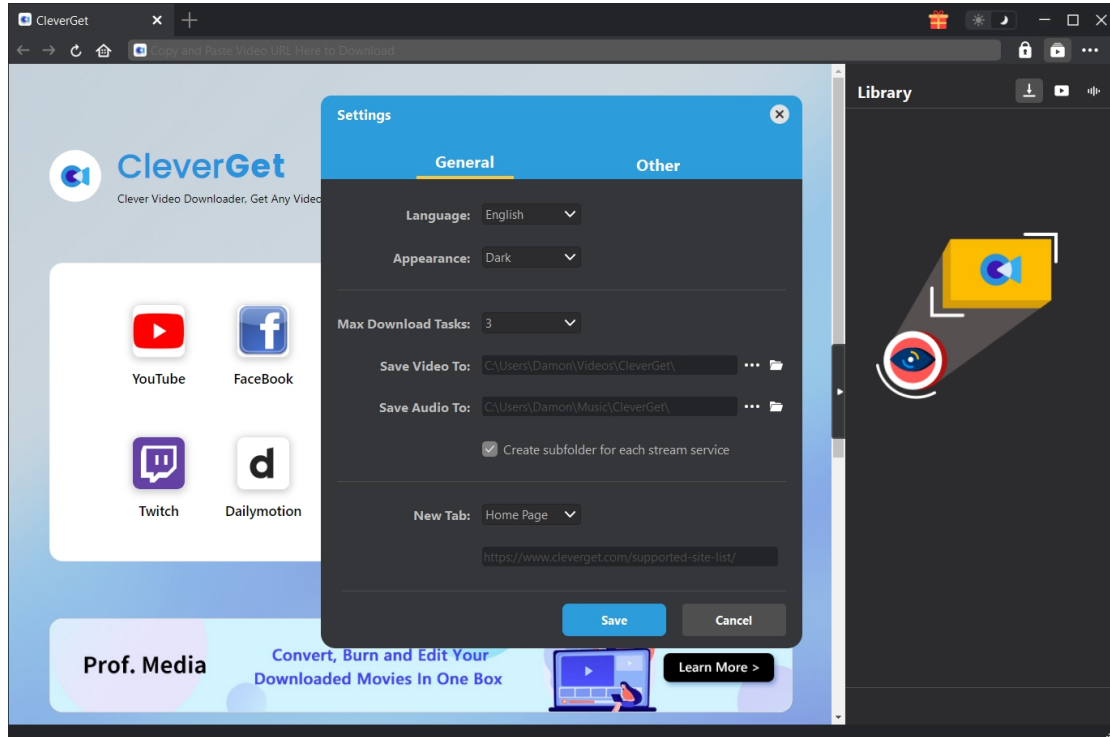

General Tab

In the “General” tab, you can find almost all basic settings that you may need. Here we have:

1. **Language:** You can change interface language in this section, where 5 languages are selectable.
2. **Appearance:** It allows you to switch between light and dark mode and you are able to change it directly by clicking “Light/Dark Mode” icon  on the main page.
3. **Max Download Tasks:** Ranging from 1 to 5, maximum volume of download tasks are changeable.
4. **Save Video To:** Change output video files location.
5. **Save Audio To:** Change output audio files location.
6. **Create subfolder for each stream service:** Automatically create subfolders for all modules and save and classify downloaded videos to corresponding subfolders.
7. **Home Page:** Users are happy to find that they are able to set default page or custom page as

home page as they like.

8. **New Tab:** Choosing to open a new tab to default page or blank page is available in this section.

Other Tab

Open Other tap to enable/disable “Automatic Update” feature and set frequency that you suppose CleverGet to check for update within “Check the Update” button.
